

# As easy as **sun**, two, three!

**Cut your electric bill by \$100 per year.\*\***

Dear <<Variable First and Last Name>>,

Duke Energy's Shared Solar program makes it possible for everyone to participate in solar energy without the hassle or expense of putting rooftop panels on your own home! You get maximum savings in the summer months when the sun shines brightest, **so enroll soon!**

**No solar panels installed on your property. No maintenance. No hassles.** Your small monthly fee supports solar energy produced at a local Anderson County solar farm. It's a win-win for your wallet and the environment!

Your participation is as easy as:

## **1. APPLY**

Confirm your income eligibility on the application enclosed, complete the top portion of the form and take it to your nearest local community agency

<<variable - agency info>>

## **2. SUBSCRIBE**

Pay a monthly fee of \$12\* for 2 kilowatts of solar energy. Program application costs and enrollment fees are waived – a \$120 value!

## **3. SAVE**

Receive monthly bill credits equal to the amount of energy your share produces – **\$100 per year.\*\***

**Space is limited.** Apply to Shared Solar today!

Visit [duke-energy.com/SolarSaver](http://duke-energy.com/SolarSaver) or contact us at **866.233.2290** for more information or questions.

\* Although participants pay a \$12 monthly subscription fee, the Shared Solar monthly bill credit should equal or exceed that fee. So, monthly program fees are typically covered in the bill credits!

\*\* Solar production and bill credits vary based on changes in the weather. Solar facilities produce more in the summer and less in the winter.

BUILDING A SMARTER ENERGY FUTURE®

## DUKE ENERGY SC SHARED SOLAR DISCLOSURES

The following terms and conditions apply to your enrollment in the Shared Solar program.

1. Enrollment Process
  - A. When you confirm your enrollment in the program, your subscription is being reserved for you until you pay the application fee and initial fee that appear on your next Duke Energy Progress statement. If you do not pay the fees by the time the payment is due, your reservation will be canceled and your application fee not returned. The initial fee credit will appear on the following statement.
  - B. Monthly subscription charges and credits will start on the bill following the payment of the application fee and initial fee.
2. Maximum Subscription
  - A. Subscriptions cannot exceed the annual estimated usage for the account.
  - B. If the Shared Solar subscription produces a net credit on the bill for four consecutive months, Duke Energy may lower the subscription.
  - C. Initial fees will not be refunded for subscriptions that are lowered.
3. Depending on the weather, there may be months when the subscription charge exceeds the credit. In winter months, especially the month of December, when there is the least amount of sunlight, solar production is typically lowest.
4. Duke Energy and Clean Energy Collective, the developer of the software that enables Shared Solar, may contact customers from time to time via email to provide program updates or seek program feedback.
5. All environmental attributes, including but not limited to “renewable energy certificates” (RECs), “renewable energy credits” or “green tags” associated with the solar photovoltaic (PV) generation system, shall be conveyed to the company for the life of the installation, and customer certifies that the environmental attributes have not and will not be marketed or otherwise resold for any purpose, including another distributed energy resource standard or voluntary purchase of renewable energy certificates in South Carolina or in any other state or country for the contract period and any successive contract periods thereto.
6. The program ends August 2028.
7. Cancellations
  - A. There is no fee to cancel.
  - B. There are no refunds of initial fees.
  - C. Customers may choose not to participate at any time by calling Duke Energy Progress to cancel their subscriptions.
8. Moving
  - A. Shared Solar subscriptions can be moved within a Duke Energy Progress service area at no cost. Charges and credits will not appear on the final bill at the old location and the first bill at the new location but will continue after that.
  - B. Shared Solar subscriptions are only available to customers receiving service in Duke Energy Progress’ service area. If you move out of the service area, the subscription ends, even if it is to the other Duke Energy Progress service area in South Carolina. There will be no charges or credits on the final bill. There are no refunds of initial fees.
9. Duke Energy Progress Account Delinquency
  - A. Duke Energy Progress may remove from the program customers who are not paying their bills on time.
  - B. No refunds of application fees or initial fees will be given.
  - C. Customers may enroll again when eligible to participate, but new application and initial fees will apply. If a waiting list exists at that time, the customer’s name will be placed at the bottom of the waiting list.
10. Customers enrolled in net metering or those with Power Purchase Agreements are not eligible to participate in Shared Solar.
